PETERKA PARTNERS NEWS

PETERKA PARTNERS

YOUR CEE LAW FIRM

The goal of the **Polish-Hungarian Chamber of Commerce** is to provide its members with up-to-date business information about the Hungarian market. In cooperation with our member company PETERKA & PARTNERS, we would like to draw attention to two important recent changes:

- Right to Repair – New Obligations for Manufacturers

Hungary is preparing new “right to repair” rules. Manufacturers of certain products, including household appliances and mobile devices, may have to offer repairs even outside statutory warranty periods. Businesses should prepare for the new requirements.

- **New Transfer Pricing Rules**
Hungary’s new transfer pricing decree applies from the 2026 tax year, introducing more detailed requirements for documentation, benchmarking, and financial segmentation. Companies with related-party transactions should review their processes and data availability.

Rohlig SUUS Logistics: SUUSustainability: Building a More Sustainable Future in Logistics

SUUSustainability: Building a More Sustainable Future in Logistics

Sustainability is becoming an increasingly important part of the logistics industry, and **ROHLIG SUUS Logistics** is putting ESG principles at the centre of its long-term development strategy.

Under its **SUUSustainability** strategy, SUUS focuses on three key pillars: **Climate Credibility, Social Empowerment and Logistics of Value**. The company’s approach combines reducing its environmental impact with supporting employees, transport partners and local communities, while promoting responsible business practices across its value chain.

On the environmental side, SUUS is working to reduce greenhouse gas emissions, improve energy efficiency and increase the use of renewable energy. Its logistics network includes **32 warehouses, 20 of which are BREEAM certified**, while electric vehicle charging stations are available at 11 locations. The company also focuses on optimising transport routes and cargo utilisation to reduce emissions.

The social dimension of the strategy places people at the centre. SUUS supports employee well-being and professional development, while also providing benefits and support programmes for its transport partners. In 2024, the company was recognised as the **Best Employer in the TSL industry**.

Through its **Logistics of Value** pillar, SUUS also emphasises responsible cooperation throughout its supply chain, ethical business practices and continuous improvement of service quality.

The company’s approach demonstrates how sustainability can become an integral part of modern logistics — combining environmental responsibility, people-focused initiatives and

long-term business value.
