SZEKSZÁRD

As a family winery with the new generation involved, we are working on 23 ha. We are grateful that we were given the opportunity to work on a more than 100-year-old parcel of Kadarka. Our focus is on our vineyards. We are committed to working in harmony with nature and preserve it for the future generations.

The Szekszárd wine region has demonstrated for millennia that it is a unique habitat. There is an unrivalled opportunity to produce great red wines in the east and south-west valleys of the hills. East of this point begins a plain area that stretches to the Carpathians. The beams of the rising sun hit the vine hills and start to warm them early on. The greatness of the Szekszárd hills lies in the hidden valleys where unique microclimates develops.
